### **Public Statement: 53 International NGOs warn Israel's recent registration measures will impede critical humanitarian action**

International humanitarian organizations operating in the occupied Palestinian territory warn that Israel's recent registration measures threaten to halt INGO operations at a time when civilians face acute and widespread humanitarian need, despite the ceasefire in Gaza. On 30 December, 37 INGOs received official notification that their registrations would expire on 31 December 2025. This triggers a 60-day period after which INGOs would be required to cease operations in Gaza and the West Bank, including East Jerusalem.

INGOs are integral to the humanitarian response, working in partnership with the United Nations and Palestinian civil society organizations to deliver lifesaving assistance at scale. The United Nations, the [Humanitarian Country Team](#), and [donor governments](#) have repeatedly affirmed that INGOs are indispensable to humanitarian and development operations and have urged Israel to reverse course.

Despite the ceasefire, humanitarian needs remain extreme. In Gaza, one in four families survives on just one meal a day. Winter storms have displaced tens of thousands, leaving 1.3 million people in urgent need of shelter. INGOs deliver more than half of all food assistance in Gaza, run or support 60 per cent of field hospitals, implement nearly three-quarters of shelter and non-food item activities, and provide all treatment for children with severe acute malnutrition. Their removal would close health facilities, halt food distributions, collapse shelter pipelines, and cut off life-saving care. In the West Bank, ongoing military raids and settler violence continue to drive displacement. Further

restrictions on INGOs would sharply reduce the reach and continuity of lifesaving assistance at a critical moment.

Recent efforts to assess the impact of deregistering INGOs through selective metrics do not capture how humanitarian assistance is delivered in practice. Humanitarian access must be measured by whether civilians receive the right assistance, in the right place, at the right time.

INGOs operate under strict donor-mandated compliance frameworks, including audits, counterterror financing controls, and due diligence requirements that meet international standards. More than 500 humanitarian workers have been killed since 7 October 2023. INGOs cannot transfer sensitive personal data to a party to the conflict since this would breach humanitarian principles, duty of care and data protection obligations. False narratives delegitimize humanitarian organizations, endanger staff, and undermine the delivery of assistance.

This is not a technical or administrative matter, but a deliberate policy choice with foreseeable consequences. If registrations are allowed to lapse, the Israeli government will obstruct humanitarian assistance at scale. Humanitarian access is not optional, conditional, or political. It is a legal obligation under international humanitarian law. This move would also set a dangerous precedent by extending Israeli authority over humanitarian operations in the occupied Palestinian territory, contrary to the internationally recognized legal framework governing the territory and the role of the [Palestinian Authority](#).

We call on the Government of Israel to immediately halt deregistration proceedings and lift measures obstructing humanitarian assistance. We urge donor governments to use all available leverage to secure the suspension and reversal of these actions. Independent, principled humanitarian operations must be protected to ensure civilians can receive the assistance they urgently need.

#### **Note to editors:**

- The role of INGOs is irreplaceable across all humanitarian sectors:
  - **Health:** INGOs run or support approximately 60 percent of Gaza's field hospitals. Deregistration would result in the immediate closure of roughly one in three health facilities.
  - **Food security:** INGOs delivered more than half of all food assistance in 2024, including the majority of cooked-meal distribution points.
  - **Shelter:** INGOs have implemented nearly three-quarters of all shelter and non-food item activities. Approximately 600,000 shelter items are currently in INGO supply pipelines.
  - **Water and sanitation:** INGOs deliver 42 percent of all WASH services, including outbreak prevention and response for acute watery diarrhea.
  - **Nutrition:** INGOs support all five stabilization centers treating children with severe acute malnutrition, representing 100 percent of Gaza's treatment capacity.

- **Mine action:** INGOs provide more than half of all funding for explosive hazard clearance. Removal of INGOs would result in capacity reductions of up to 100 percent.
- **Education:** INGOs run or support around 30 percent of emergency education activities, which already reach only a limited proportion of the school-age population.
- Principled humanitarian organizations cannot transfer sensitive personal data of national staff or their families. This is consistent with humanitarian principles, duty-of-care obligations, and global data-protection standards applied across all contexts.
- Restrictions on INGOs also directly affect Palestinian and Israeli partner organizations, undermining local response capacity, disrupting funding flows, and weakening community-based service delivery across sectors.
- INGOs are legally authorized to operate and remain committed to delivering humanitarian assistance through UN coordination systems and local partnerships, while continuing to seek the removal of measures that obstruct aid delivery.

Recent CMEP Statements and Press Releases:

**Dec 18, 2025: [Public Statement: CMEP Supports the Patriarchs and Heads of Churches' Appeal for Children with Cancer in Gaza](#)**

Churches for Middle East Peace (CMEP) elevates and stands in solidarity with the Patriarchs and Heads of the Churches in Jerusalem in their statement of Support for the Work of Augusta Victoria Hospital in Treating Children with Cancer from Gaza. We echo their urgent humanitarian appeal to the relevant Israeli authorities to grant permits allowing children in Gaza diagnosed with leukemia to travel to Augusta Victoria Hospital on the Mount of Olives for life-saving, specialized treatment that is unavailable in Gaza. These are young and vulnerable patients whose survival depends on timely access to care. Delays in treatment for childhood cancer can mean the difference between life and death.

**Dec 17, 2025: [Press Release: UNRWA USA Leads 104 Organizations Urging Trump Administration to Include UNRWA in Gaza's Recovery](#)**

UNRWA USA National Committee (UNRWA USA) led a national coalition of 104 civil society organizations, including Churches for Middle East Peace, to urge the Trump Administration to include the United Nations Relief and Works Agency for Palestine Refugees (UNRWA) in its plans for Gaza's recovery. In a joint letter to U.S. Secretary of State Marco Rubio, refugee, human rights, and humanitarian organizations called on the Trump Administration "to re-open lines of communication with UNRWA and allow the Agency to continue fulfilling its mandate in accordance with international humanitarian principles, until a just and lasting solution to the plight of Palestine refugees is secured."

**December 15, 2025: [Public Statement: CMEP Condemns the Terrorist Attack at Bondi Beach](#)**

Churches for Middle East Peace (CMEP) joins the Council of Patriarchs and Heads of Churches in Jerusalem in strongly condemning the horrific terrorist attack at Bondi Beach in Australia, which targeted the Jewish community on the first night of Hanukkah. We echo their unequivocal rejection of this violence and stand in deep solidarity with the Jewish community in Australia and across the world.

**Dec 12, 2025: Press Release: [Humanitarian Snapshot 13 Reveals Dire Post-Ceasefire Conditions in Gaza and the West Bank](#)**

Humanitarian Snapshot 13 exposes the grim realities facing Palestinians in the wake of the recent ceasefire deal. Drawing on testimonies from 45 NGOs and signed by more than two dozen leading aid and humanitarian organizations, the report documents ongoing Israeli obstruction of life-saving assistance, the deepening hardship on already-devastated communities, and the continued pattern of Israeli airstrikes despite the ceasefire framework. It also chronicles a sharp escalation of violence by Israeli forces and settlers in the West Bank, underscoring the widening crisis across the occupied territories. This snapshot offers an urgent, evidence-based call for action to protect civilians, ensure unfettered humanitarian access, and confront the structural violence driving this humanitarian emergency.

**December 10, 2025: [Churches for Middle East Peace \(CMEP\) Elevates the Findings of the “Protecting Holy Land Christians” Report](#)**

Churches for Middle East Peace (CMEP) welcomes and affirms the newly released Protecting Holy Land Christians report and its urgent call to safeguard the Christian presence in the Holy Land. We stand in deep solidarity with our sisters and brothers whose testimonies fill these pages, and we bear witness to the daily realities facing Christian communities, churches, and institutions across Gaza, the West Bank, and Jerusalem.
